Citigroup Institutional Clients Group Technology
Summer Analyst Role Profile

About Institutional Client Group
In the fast-paced, dynamic world of capital markets, our technology and people drive our competitive advantage. Our Institutional Client Group (ICG) technologists support and enable the success of our trading businesses. Utilizing a broad range of technologies, our team is at the forefront of innovation – driving our systems/processes toward scalable, low-latency, high-frequency enterprise systems that support Citi and our aggressive growth strategy.

The Summer Technology Analyst Program is a 10 week program. You will be placed into a designated organization within ICG as an Application Developer or a Production Support Analyst. The program is comprised of speaker series lectures, projects, trainings, and hands-on experience. In addition, we offer a variety of networking, mentoring, and community service events for you to participate in. This program also provides you with the opportunity to be eligible to return for another summer as a Summer Analyst, or return for a full time position within the Technology Analyst Program.

Citi’s most important resource is its people which consist of a diverse group of highly talented individuals. As such, you’ll notice the emphasis on networking, mentoring, and building relationships with your fellow Analysts and colleagues.

Skills
To be a successful Technology Analyst, you should possess a strong work ethic, high energy level, and strong interpersonal and communication skills. Successful program participants will share many common traits:
- Analytical thinkers
- Quick learners who are capable of organizing and structuring information effectively
- Collaborators who are quick to seek the help of colleagues and who recognize the value of teamwork, support and mutual assistance
- Enthusiastic leaders, eager to advance quickly and assume greater responsibility
- Innovators who can think outside the box and beyond the limits of a position or process
- Strong communicators with the ability to articulate new ideas, express and comprehend feedback
- Candidates should also be great problem solvers and passionate about Technology
- Knowledge of C#, .Net, Java, Closure, SQL, or any other related languages.

Qualifications:
Degree(s): Bachelors Degree
Major(s): Computer Science, Computer Engineering, Management Information Systems, other Tech related degree
GPA: 3.0 or higher
Locations: New York, NY; Jersey City, NJ; Warren, NJ; Long Island City, NY, Mount Pleasant, SC

Shape your career. Shape the industry.

Summer Technology Analyst Tracks:

Application Developer:
Our Application Developers are expected to propose suitable solutions to a variety of common programming problems. Candidates should have a fundamental understanding of current programming, multi-threading, and familiarity with basic concepts of relational databases. Working knowledge of either C# or Java should be demonstrated to design and build technology software solutions to meet business requirements.

Production Support:
Our Production Support Analysts are expected to handle trading support for all areas of the business. Candidates will be involved with providing direct support and solutions through real-time interactions with traders and related personnel ranging from technical challenges to business problems. The ability to swiftly adapt to changing environments, basic understandings of the capital market, product knowledge, as well as fundamental programming skills are all critical for success in this field.
ICG Businesses:

Citi Markets Technology (CMT):

Citi Markets Technology provides front-to-back, world-class products and financing solutions for corporations, governments, and institutional and retail investors through our dominant underwriting, sales and trading, and distribution capabilities.

CMT product knowledge and on-the-ground local markets expertise -- coupled with complementary strengths in technology and distribution -- allows CMT to offer clients a wide range of comprehensive financial solutions. CMT addresses their needs with products in all major currencies, sectors and geographies; and the breadth and depth of CMT’s resources allow CMT to consistently provide them with innovative solutions. Citi provides superior structuring capabilities and problem solving, enhanced by CMT’s distribution reach and quality.

CMT’s platform is organized around four major geographic regions: Asia, Europe/Middle East/Africa, Latin America and North America. We have offices in nearly every major city around the globe. In Japan, CMT maintains a market leading position through Nikko Citi, our joint venture with Nikko Cordial Corporation.

Treasury & Trade Services (TTS) Technology: Major product areas are Cash Management Services, Payments, Liquidity & Investments, Receivables, Commercial Cards, and Trade Finance & Services.

Securities & Fund Services (SFS) Technology: Provides services for Global Custody, Direct Custody & Clearing, Long Funds, Hedge Fund Services, Open Wealth, Private Equity, Securities Finance, Information Services, Collateral Management and ETF.

Citi Private Bank (CPB) Technology:

Citi Private Bank Technology provides technology services to the Citi Private Bank Business. The Private Bank Technology organization is aligned by Market Region and Global Product Line. This organization is currently working on technology that will free up our partners to focus on sales and growth of the business, upgrade client experience through superior touch points, seamless processing, and streamlining and automating processes.

Information Services Group (ISG):

Information Services Group aims to deliver authoritative, accurate and timely sources of reference data to the firm through service-oriented operations teams and state-of-the-art technologies.

Application Process:

Interested candidates MUST also apply to the ICG Technology Summer Analyst Program through Citi’s online campus site www.oncampus.citi.com.
